Call for Papers

# Fourth Workshop on the Economics of Information Security

Harvard University

June 2 - 4 2005

Important Dates:

Submissions due - February 25

Notification of acceptance - March 11

Final papers due - April 8

The Fourth Workshop on the Economics of Information Security invites talks emphasizing economic theory, mathematical modeling, or legal theory. Past notable work used the tools of economics to offer insights into computer security; offered mathematical models of computer security or economics; detailed potential regulatory solutions to computer security; or clarified the challenges of improving security as implemented in practice.
